ALPER FARUK KIZILHAN

PERSONAL INFORMATION

Nationality: Turkish

E-mail: kizilhanalper@gmail.com / alper@kizilhan.com.tr

Github: github.com/alperkizilhan

Birth Date: 12.08.2000

Phone: +90 5358260200

SKILLS

Java, Spring Framework, Kafka, JPA, Hibernate, MySql, Flutter, React, JavaScript, RestAPI, Json, Git

EDUCATION

2019 - 2024 (Bachelor Degree) - Computer Engineering, Erciyes University, Turkey

2023 - 2024 (Erasmus +) - Software Engineering, Tomas Bata University, Czechia

EXPERIENCES

August 2023 - September 2023 - Startup Heroes - Backend Developer Intern
- Experience working with Spring Framework and Design Patterns such as MVC, MVVM, Repository, Unit of Work, IoC Container, Dependency Injection, etc.
- Strong understanding of object-oriented programming principles and effective implementation skills.
- Successful integration of backend web services using REST APIs.
- Knowledge of general database management systems and expertise in data modeling, particularly with MySQL databases.
- Experience with Apache Kafka messaging systems, managing data flow securely and efficiently.
- Proficient in using tools like Jira and Confluence for managing sprints and documentation.
- Testing code with JUnit

March 2021 - February 2023 - Buddy Finder Startup - Mobile Application Developer
- I am experienced in developing user interfaces and Firebase connections for mobile applications using Flutter technology.
- I developed the user interface and Firebase connection for the mobile application "Buddy Finder," providing a modern and user-friendly experience.
- I designed the user interface in accordance with Material Design principles to create an intuitive and visually appealing layout.
- I utilized Firebase Cloud Firestore for secure and fast data management, enabling automatic synchronization processes for efficient data handling.

December 2020 - I was selected to the KeepMoving team working on Artificial Intelligence by Prof. Alper Baştürk, a professor of Computer Engineering at Erciyes University.

PROJECTS

09.2023 - 01.2024 - Full Stack E-Commerce website with Angular and Java Spring Boot
- Spring Framework, MVC, MVVM, Repository, Unit of Work, IoC Container, Dependency Injection, Rest Apis, MySQL, Angular, Stripe, Okta etc.

TRAININGS

02.2023 - Full Stack: React and Java Spring Boot - The Developer Guide (Udemy, 26 hours)

08.2022 - Spring Boot 3, Spring 6 & Hibernate for Beginners (Udemy, 34 hours)

01.2021 - Android and iOS Apps Development with Flutter & Dart Course (Udemy, 92 hours)

09.2020 - Harvard University CS50x Course (edX, 30 hours)

LANGUAGES

English(Upper-Intermediate), **German**(Beginner)
